Rollers and Maintainers . . . by GALION

The Galion line of Road Rollers and Maintainers is complete

The illustration above shows a Galion Master Roller smoothing a macadam road. The Galion No. 20 Mixing and Leveling Drag is shown in operation below.

ROLLERS—There is a type and size to meet every road building requirement. They are powerful, sturdy and dependable with ample power for any emergency.

MAINTAINERS—For use in leveling earth, gravel, stone and retread roads. Built in three types—Multiple Blade, Mixing and Leveling Drag and the Dual Control Maintainer. They can be quickly hitched to any power unit.

Complete information covering Galion Motor Rollers and Road Maintainers or other types of Galion Road Machinery will be sent on request.

HOW SMART ARE YOU?

*It should take about 15 minutes
to get correct solution.*

On a dump truck going from Chicago to Detroit were the "Dump Truck Driver on the Job", the Timekeeper, and a Shovel Operator, whose names were Smith, Jones and Robinson, not respectively. They happened to be giving a lift to three friends of the same names. In the following details, the passengers are designated by the prefix Mr.

1. Mr. Robinson lives in Detroit.
2. The Timekeeper lives half-way between Chicago and Detroit.
3. Smith beat the Shovel Operator at billiards.
4. Mr. Jones makes exactly \$2,000 per year.
5. The Timekeeper's nearest neighbor, who is one of the passengers, makes exactly three times as much as the Timekeeper.
6. The passenger living in Chicago has the same name as the Timekeeper.

Question:

Who is the "Dump Truck Driver on the Job?"

Correct solution sent on request.

COLD DAYS DON'T SLOW-UP THE LITTLEFORD DISTRIBUTOR

Frosty mornings won't delay your surface coating operations—if you are using a Littleford Pressure Distributor. You don't have to use an extra torch to thaw out working parts before operations can start. This Distributor is different. Let us tell you about its Low-Pressure Burner, Heat Deflector, Heat Flues and Single-Valve Control of bitumen. Write for Bulletin No. H-14, the most complete booklet ever prepared on pressure distributors.

A Striking Example of Progressive Road Construction

Highway officials of Ingham County, Michigan, have shown what careful planning and good management can accomplish in road building.

During the past three years, sixty-three miles of low cost roads have been built in Ingham County. These roads are handling the increased traffic satisfactorily in every respect, and are a

very credible addition to the many thousands of miles of roads in which Standard Asphalt Road Oil has been used.

Standard Asphalt Road Oil has been used and proved as to its durability and economy. If you are interested in low cost roads, you cannot afford to overlook Standard Asphalt Road Oil.
